77. "Create engaging hooks for social media."
78. "Write script for reels/shorts."
79. "Generate blog titles with power words."
80. "Create content for email funnel."

3. ADVANCED PLUGIN DEVELOPMENT (81–120)

81. "Create a WordPress plugin that registers a custom REST API endpoint and returns JSON data."
82. "Build a plugin that integrates with an external API and stores data in a custom database table."
83. "Write a plugin with AJAX-based live search functionality."
84. "Create a plugin that implements role-based access control."
85. "Build a plugin that logs user activity and displays analytics dashboard."
86. "Create a plugin with Gutenberg block support."
87. "Write a plugin that handles file uploads securely."
88. "Create a plugin with scheduled cron jobs."
89. "Build a plugin that integrates with WooCommerce."
90. "Write a plugin with custom admin UI using React."
91. "Create plugin with shortcode generator UI."
92. "Build plugin with caching system."
93. "Write plugin for image optimization."
94. "Create plugin for SEO analysis."
95. "Build plugin with API authentication."
96. "Write plugin for form builder."
97. "Create plugin for notifications system."
98. "Build plugin for analytics tracking."
99. "Write plugin for custom dashboards."
100. "Create plugin for performance monitoring."
101. "Build plugin with multi-language support."
102. "Write plugin for backup automation."
103. "Create plugin for security scanning."

104. **"Build plugin with drag-and-drop UI."**
105. **"Write plugin for email automation."**
106. **"Create plugin for content scheduling."**
107. **"Build plugin for database optimization."**
108. **"Write plugin for user management."**
109. **"Create plugin for caching optimization."**
110. **"Build plugin for image compression."**
111. **"Write plugin for API integration."**
112. **"Create plugin for custom widgets."**
113. **"Build plugin for reporting dashboard."**
114. **"Write plugin for form validation."**
115. **"Create plugin for spam protection."**
116. **"Build plugin for URL shortener."**
117. **"Write plugin for SEO audit."**
118. **"Create plugin for analytics visualization."**
119. **"Build plugin for content recommendations."**
120. **"Write plugin for user notifications."**

4. ADVANCED WOOCOMMERCE (121–160)

121. **"Create a WooCommerce plugin that applies dynamic pricing based on user roles with full PHP implementation."**
122. **"Write code to customize WooCommerce checkout fields and validate them before order submission."**
123. **"Build a WooCommerce system that shows personalized product recommendations based on user behavior."**
124. **"Create a custom WooCommerce product page template with optimized conversion layout."**
125. **"Write a script to automatically send follow-up emails after purchase in WooCommerce."**
126. **"Create a WooCommerce plugin that generates invoices automatically in PDF format."**
127. **"Build a cart abandonment recovery system with email automation."**
128. **"Write code to implement multi-currency support in WooCommerce."**
129. **"Create a WooCommerce upsell and cross-sell strategy with UI suggestions."**
130. **"Develop a plugin to add custom shipping rules based on location and cart value."**
131. **"Optimize WooCommerce site for high conversion rate with UX improvements."**
132. **"Write a WooCommerce hook to modify order status automatically based on conditions."**
133. **"Create a system to display real-time stock alerts on product pages."**
134. **"Build a custom coupon system with advanced conditions."**
135. **"Write code for integrating a third-party payment gateway into WooCommerce."**
136. **"Create a WooCommerce dashboard for tracking sales analytics visually."**
137. **"Optimize product images and lazy loading for WooCommerce performance."**
138. **"Build a custom product filter system using AJAX."**

139. **"Create a subscription-based WooCommerce product system."**
140. **"Write a script for bulk product upload and management."**
141. **"Create a loyalty program for WooCommerce users."**
142. **"Build a referral system integrated with WooCommerce orders."**
143. **"Write code to customize WooCommerce email templates."**
144. **"Create a product comparison feature with dynamic data."**
145. **"Build a flash sale countdown system for WooCommerce."**
146. **"Create a WooCommerce analytics plugin with charts."**
147. **"Optimize WooCommerce checkout for mobile users."**
148. **"Create a wishlist feature for WooCommerce."**
149. **"Write a script to track abandoned carts and notify admin."**
150. **"Build a product bundle system with dynamic pricing."**
151. **"Create a system for auto-generating product descriptions using AI."**
152. **"Write WooCommerce hooks for customizing cart behavior."**
153. **"Build a real-time sales notification popup system."**
154. **"Create a system for managing product reviews with moderation."**
155. **"Optimize WooCommerce database queries for performance."**
156. **"Build a multi-vendor system using WooCommerce."**
157. **"Create advanced shipping cost calculator."**
158. **"Write code for integrating WooCommerce with CRM tools."**
159. **"Create dynamic product pricing based on user history."**
160. **"Build a WooCommerce order tracking system with UI."**

5. ADVANCED ACF (161–190)

161. "Create a fully dynamic WordPress page builder using ACF flexible content fields."
162. "Write code to display ACF repeater fields with custom loops in theme templates."
163. "Build a Gutenberg block using ACF with custom styling options."
164. "Create a dynamic landing page system using ACF and reusable blocks."
165. "Add ACF fields to WooCommerce products and display them on frontend."
166. "Create conditional logic forms using ACF fields."
167. "Build a custom admin dashboard using ACF fields."
168. "Create dynamic menus and navigation using ACF."
169. "Write ACF integration with REST API to expose custom fields."
170. "Create a frontend submission form using ACF."
171. "Build a custom theme using only ACF for content management."
172. "Optimize ACF queries for performance in large sites."
173. "Create multilingual ACF fields using WPML or Polylang."
174. "Build reusable content sections using ACF."
175. "Create dynamic sliders using ACF repeater fields."
176. "Write code for displaying ACF fields in shortcode format."
177. "Build a custom post layout system using ACF fields."
178. "Create ACF options page for global settings."
179. "Add validation rules to ACF fields."
180. "Build dynamic forms with ACF and AJAX submission."
181. "Create custom widgets using ACF fields."
182. "Build a dynamic blog layout using ACF."
183. "Create custom taxonomy fields using ACF."

184. "Write code to export and import ACF field groups."
185. "Create reusable Gutenberg sections with ACF."
186. "Build custom user profile fields using ACF."
187. "Create dynamic footer/header using ACF."
188. "Optimize ACF for speed and caching."
189. "Build frontend editing system using ACF."
190. "Create advanced UI components using ACF."

6. ADVANCED DEBUGGING (191–230)

191. "Diagnose and fix 'There has been a critical error on this website' with step-by-step debugging process."
192. "Analyze and resolve WordPress plugin conflicts using debugging techniques."
193. "Identify and fix slow loading issues using performance profiling tools."
194. "Debug database connection issues and optimize queries."
195. "Fix white screen of death and enable debug logs."
196. "Analyze JavaScript console errors and fix them in WordPress theme."
197. "Fix CSS conflicts breaking layout across devices."
198. "Resolve memory limit issues by optimizing code."
199. "Debug REST API issues and incorrect responses."
200. "Identify broken links and fix them automatically."
201. "Debug theme compatibility issues."
202. "Fix WordPress login redirect loop issue."
203. "Analyze email delivery issues and fix SMTP problems."
204. "Fix image loading and media library issues."
205. "Resolve infinite redirect loops."
206. "Debug WooCommerce checkout errors."

207. **"Fix mobile responsiveness issues."**
208. **"Debug caching conflicts with plugins."**
209. **"Fix SSL certificate issues."**
210. **"Debug server-side errors (500, 403)."**
211. **"Fix plugin update failures."**
212. **"Debug cron job scheduling issues."**
213. **"Fix file permission errors."**
214. **"Optimize slow database queries."**
215. **"Debug AJAX request failures."**
216. **"Fix API integration errors."**
217. **"Debug pagination issues."**
218. **"Fix form submission errors."**
219. **"Analyze SEO-related technical issues."**
220. **"Debug frontend rendering issues."**
221. **"Fix broken layouts in themes."**
222. **"Debug theme customization bugs."**
223. **"Fix file upload errors."**
224. **"Analyze performance bottlenecks."**
225. **"Fix sitemap errors in SEO plugins."**
226. **"Debug WordPress search functionality."**
227. **"Fix session handling issues."**
228. **"Debug cache invalidation issues."**
229. **"Fix translation/language bugs."**
230. **"Analyze hosting-related issues."**

7. ADVANCED AUTOMATION & AI (231–280)

231. "Create an AI-powered system to automatically generate and publish WordPress blog posts with SEO optimization."
232. "Build an automation workflow to generate meta titles and descriptions using AI."
233. "Create an AI chatbot for WordPress that answers user queries dynamically."
234. "Automate internal linking using AI suggestions."
235. "Build an AI tool to generate blog images automatically."
236. "Create workflow to auto-post WordPress content to social media."
237. "Build AI-based content recommendation engine."
238. "Create automated email marketing system using AI."
239. "Generate AI-based content calendar for 30 days."
240. "Create AI-powered keyword research tool."
241. "Automate backup system with scheduled tasks."
242. "Build AI SEO analyzer tool."
243. "Create AI-based content rewriting system."
244. "Automate WooCommerce email flows."
245. "Build AI-powered support chatbot."
246. "Create automated analytics dashboard."
247. "Build AI-powered search engine for WordPress."
248. "Automate form response handling using AI."
249. "Create AI-based landing page generator."
250. "Automate translation using AI tools."
251. "Generate AI-based product descriptions."
252. "Automate performance optimization tasks."
253. "Build AI analytics reporting system."

254. "Automate website security checks."
255. "Create AI chatbot with conversational flows."
256. "Automate image compression and optimization."
257. "Build AI personalization engine."
258. "Automate user onboarding workflows."
259. "Create AI-based lead generation system."
260. "Build CRM integration with automation."
261. "Automate data entry tasks."
262. "Create AI-based content planner."
263. "Automate push notifications system."
264. "Build AI email responder system."
265. "Automate SEO audits with AI."
266. "Create AI keyword generator tool."
267. "Automate customer support system."
268. "Build AI plugin generator system."
269. "Automate website monitoring."
270. "Create AI-generated analytics reports."
271. "Automate content updates."
272. "Build recommendation engine using AI."
273. "Automate A/B testing workflows."
274. "Create AI heatmap analysis system."
275. "Automate UX improvements using AI insights."
276. "Build chatbot conversation flows."
277. "Automate marketing funnel creation."
278. "Create AI growth hacking strategy."
279. "Build automated content distribution system."

280. "Create AI-powered full website management system."
